#### MARION ICE AND STORAGE COMPANY

Assured This Time. - Machinery Purchased Sixty Days Ago

CONTRACT LET FOR SINKING THE WELL

C. W. Metcalfe, manager of the new industry, was in Marion this week. While here he placed orders for all building material for erecting a modern ice plant with cold storage All the material will be placed on the ground at once. A contract was also let for the sinking of a deep well to secure soft water.

All the machinery for the plant was purchased sixty days ago and is now ready to come forward when the build ing is ready for reception.

The company Mr. Metcalfe represents will have, with this plant, four modern ice and storage plants and will not only be in position to furnish first class ice but at a moderate price.

They will be well prepared to take eare of wholesale trade as the plant will be of good size and located on the well located lot adjoining the Electric Light plant where they have unexcelled receiving and shipping facilities.

This plant will fill a long needed industry with us, and that the managers in charge have shown that they know how to make first-class ice.

Those wanting ice between now and the opening of the plant can get it of John Sutherland or J. W. Givens, who have ice shipped and stored here by this company.

We understand wagon trade for country use will be supplied with ice at a most reasonable price.

We are glad to note the proposed enterprise has taken on substantial evidence of their fail in Marion and we extend a hearty welcome to any and all new industries.

#### An April Fool Party

The hall was dimly lighted by red and white Japanese lanterns, while a few potted Faster lilies made the entrance room a thing of beauty. After the guests had repaired to the dressng rooms they came downstairs in conservational groups and laughingly pushed away the portiere before the parlor door to find behind it-a locked door, letters pasted to the door, rubbed with phosphorus, spelling the words "April Fool!"

#### A Louisville Artist's Success in Scotland.

B. P. Williams, the well known raveling man who sells shoes in this section for the Courtney Shoe Co., of St. Louis, was here last week and was much pleased to see in the Louisville Evening Post the following notice of his son's success in Scotland where he is studying in the "Royal Glasgow institute of fine arts.

Louisville, March 9 .- Papers received in this city from Glasgow, Scotland, contain flattering mention of the paintings exhibited at the Royal Glasgow Institute of Fine Arts by Charles Sneed Williams, of Louisville. Mr. Williams is a Louisville boy who has now been studying art for four years in Scotland, and who has received the most flattering recognition from the masters who have seen his work in portraiture.

The exhibition in Glasgow is one in which such artists as John Sargeant and the other great lights of the British art would participate, and constitutes the Scotch salon. Mr. Williams had two canvasses accepted. Both are portrait studies, and both have been praised by the receiving body for shipment. and hanging committees.

Mr. Williams is only twenty-three years of age, and his career is being have attracted by his work, as one promising much brilliant achievement. He has been studying art less than five years, but is well on the The criticism from a Glasgow paper contains a list of the most notable pictures in the exhibit and after mentioning the "portrait of the Duchess of Sutherland" by Sargeant, and other masterpieces, speaks in glowing terms of the two heads submitted by Mr. Williams and accepted by the two

#### MARION'S NEW LAUNDRY COMPLETED

One of the Most Modern and Latest Improved in the State

#### AND A DESERVING HOME INDUSTRY

Only a few weeks ago it was the talk that Marion might some day have a laundry. The most enthusiastic advocates of public utilities and conveniences did not expect to see it installed and in working order until summer, but how poorly they judged is proven by the fact, that with the advent of the New Year the laundry was here-a Marion Enterpriseready for business. During the last few weeks the machinery, heating plant and other equipments necessary have been placed, as rapidly as possible, in position until now excepting the new brick stack, the plant is completely finished, and is not excelled in any city of similar size in America. In fact the laundry machinery is all of the latest improved designs.

What is necessary now to make this a success in Marion is the undivided support of Marion and the contiguous territory.

All the money you send out of the state or the county is gone for all time; what you spend here patronizing home industries may find its way back to your coffers. But aside from Last Sunday morning Marshall Mc- selfish motives each citizen of the McKee, of near Repton, was found terprise that home capital is risked lying near the track of the Illinois in, for how many of us are willing to the Crittenden Circuit Court will do likewise-put capital into any- convene. #### Kearney Blue's Nephew Disappears

So distressed is Mrs. H. W. Davis, of Cobb, Ky., over the action of her fourteen year old son in coming to Louisville and refusing to make his whereabouts known, that she neither eats nor sleeps, and the members of her family say she is almost insane. When Mrs. Davis was fourteen years of age she eloped and was married.

Walton Cebb, the missing boy, left his home and came to Louisville and found employment at \$4 per week. A notice of his disappearance was published in the paper and when the lad saw it he wrote to his parents, saying that he had a good job and was doing well, but did not give his address or say where he was employed. Mrs. Davis has written several letters to him and they are now in the office of the general delivery clerk at the postoffice.

Kearney Blue, uncle of the boy, lives at 830 Second street in Louisville, and Mrs. Davis has enlisted his aid. Mr. Blue has waited at the general delivery window at the postoffice on several occasions in hope that the boy would call for mail, but his efforts have failed. He said that he feared Mrs. Davis would lose her mind unless the boy made his whereabouts known. The case has been reported to the police. - Courier-Journal.

#### SUNDAY SCHOOL TEACHERS TRAINING CLASS

LESSON XXIII.

We have two Sunday School lessons in this week's readings. The daily reading for Monday is the S. S. lesson for July 1st, "Christ and the Children." G. T., Mt. 18:14. The daily reading for Wednesday is the lesson for July 8, "The duty of Forgiveness." G. T.. Mt. 6:12.

DAILY MANNA.

Sunday, March 18, The tribute money, Mt. 17:24-27; Mk. 9:33a. Monday, Mar. 19, Discourse on humility, Mt. 18:1-14; Mk. 9:33b-37.

Tuesday, Mar. 20, Dealing with an offended brother, Mt 18:15-20. Wednesday, Mar. 21, Discourse on forgiveness, Mt. 18:21-35. Thursday, Mar. 22, Discourse on forbearance, Mk. 9:38-50; Lk. 9:49,50 Friday, Mar. 23, Feast of Tabernacles, and solicitation of his brethren [to go, Jno. 7:2-9.

Saturday, Mar. 24, Christ's secret journey to the feast, Jno. 7:10.

#### HELPS TO STUDY.

The tribute money was the half shekel, worth about 30 cents, paid an- \$15,000, public school building costanally by every Jew above the age of twenty for the support of the temple. These collectors are not to be confounded with the publicans; these collect- etc. ed money for the government, those for the temple. By reason of the unique relation of Christ to the kingdom of God, he by right was free from paying the tax. Peter's answer in v. 25 shows that Jesus had been in the habit of paying the tax. By this means he illustrates a fixed principle of all reforms, viz, the avoidance of actions which are not absolutely essential for the success of the reform, and which, because easily misunderstood, and so arousing prejudice, would make it more difficult for others to join in the good movement. Though greater than the temple tax, that he may not put a hinderance in the way of others accepting him.

Jesus was often obliged to correct selfiish ambition in his immediate followers. (See Mt. 20:26, 27; 23:11; Mk. 10:43, 44; Lg. 22:26.) "Took a little child," a type of all that is unaggressive and unimportant it society, ions, The soil is a dark red loam, lack of ambition, innocence, etc.

In the lesson on forgiveness there is first described the method to be followed; then the extent to which one should forgive; and finally the duty to forgive is illustrated by a parable. Jesus practically removes all limit to forgiveness. And when could a loving heart refuse to forgive?

Spiritual Idea of Messiah. - Isaiah makes the striking passage in Isa. 11:1,2, refer to the Messiah as the great teacher, and understands Isa. 53: 5 to describe him as the forgiver of sins. The time of the Messiah is, ac cording to him, to be one of holiness and righteousness. A man will come forth, says the prediction (Num. 24:17), who shall smite the surrounding nations. The saints will possess holiness, power and benevolence, and thereby beget reverence, fear and love.

In the minds, especially of the better sort and the more deeply interested among the Jews, the office had a higher significance than that of king of state. He is to be King of kings and Lord of lords (Mt. 27:11: Jno. 18:36, 37; Rev. 19:16). John the Baptist declared that he "should baptize with the Holy Ghost and with fire," and thus he placed the Messiah far above himself and every other man. Especially did the godly of Israel place their whole confidence in the promises of the Scripture (Lk. 1:70-79) and hope for Messiah who would not only be a deliverer from external enemies, but also a Saviour from unrighteousness and prediction. Zacharias, in his song of praise (Lk. 1:67, etc.), speaks of the visitation and redemption of his people from the hand of all that hated them; but declares that the object of that deliverance was that they might "serve God in holiness and righteousness all the days of their life," their sins being forgiven and to I40 feet. The water is soft and their feet "led into the way of peace." Examples are found in Zacharias. Elizabeth and Mary, in aged Simeon, sighing for the fulfillment of his greatest hope, in Anna, a widow of 84 years, her heart welling up with thanksgiving to God. Of such religious, trustful and hoping souls there were certainly not a few in the land who, on the ground of prophetic promises, held firmly to the belief that now the day of salvation, not merely of political but of moral and spiritual deliverance, was not far off, and that the desire of all hearts would soon appear in their midst as the Redeemer, the Saviour, and the Light of the World.

#### TOPICS FOR STUDY.

    - a Attendance; b Punetuality
    - e Decorum; d Participation; e Giving.

#### GENERAL QUESTIONS.

1 What was the half-shekel? 2 What was its worth and its purpose? Did the publicans collect it? 4 Really should Jesus have paid this tax? 5 Had he been in the habit of paying it? 6 Had he been opposed o the temple and its worship? 7 What is the force of his argument? 8 What position as regards the temple does he by implication assume? As a reformer, did Jesus always begin with the destruction of abuses? 10 What evil was there in the ambition of the disciples to be first in the kingdom of God? 11 How did Jesus rebuke their ambition? 12 What did Jesus say that gave the little child importance? 13 What three things are taught in regard to forgiveness? 14 What is the spiritual idea of Messiah? 15 What should be the teacher's aim? 16 Tell the story by which Jesus illustrated the duty of our possessing a forgiving spirit.

#### SEARCH QUESTIONS.

What does Jesus teach is an evidence that a man is friendly to him? 2 By what other saying of his does this need to be supplemented? What is meant by causing one "to stumble?" 4 In what language does Jesus set forth the need of giving up hindrances to the highest life? 5 There will also be quite a lot of house Are they to be taken literally as a rule for life? If not, why not? 6 What

figure does Jesus use to describe the suffering produced by sin. suffering any less real because his language is figurative? 8 What is, meant by "having salt in one's self?" 9 How does Jesus teach we should treat a brother who has done us harm? 10 How far should one go in forgiving one who wishes forgiveness? 11 How did Jesus in his own life flustrate his teaching as to forgiveness? 12 What sort of ambition would Jesus approve?

#### Letter from New Mexico.

TUCUNNICAN, N. M., March 6, 1906 -- Ed. Press: Having received quite a number of letters from friends in Ky., regarding New Mexico. and as it is impossible for me to reply to all these letters, only through the columns of your paper.

Quay county, of which this city is the county seat, is ninety-three miles west of Dalhart, Texas, and is on the Rock Island railroad. This little city is four years old and is up-todate. The twelve hundred people are drawn from the various States, plexion of pimples and blotches. to be found anywhere.

We have a court house costing ing \$7,000, three nice churches, etc.

At a first glance a stranger would bowels. Woods & Orme. think that a large part of the country was made up of mountains, but when one undertakes to cross the beautiful valley from mountain to mountain, the rainbow, keeps just ahead.

In these valleys are hundreds of thousand acres of as fine land as is with just enough sand to make it ideal for cultivation.

the rainfall is sufficient for agricul- hotel. tural purposes. The rainfall in 1905 is as fellows-

Jan. 4.0: Feb. 8.0; March 2.8 April 2.1, May 2.3: June 2.5; July 4.7; August 1.1; September 2.5. Total, 22.0.

purposes. As this is comparatively hand. a new country in an agricultural ng so far from proficiency, to-wit: and said: sorghum, kaffer corn, mila maize, peas, beans, millet, melons, oats, etc Corn and wheat do well when the sod has been thoroughly broken and pul-

Water can be had in inexhaustible quantities at a depth of from 7 clear. The atmosphere is high and dry, making it delightful for those seeking relief from lung trouble and the various ailments contracted in malarial districts.

It costs \$16 dollars to homestead 160 acres, and the fee is \$3 after filing. One has six months leave of absence before settling on the claim, if so desired.

After taking a homestead one is allowed to take an additional hundred and sixty acres under the desert

In conclusion I will say that this country is good enough for me, but any one anticipating coming here on come here expecting to get rich in a ily here without sufficient means to pull you through the first year. as are improvements to make, sod to Foley's Honey and Tar. break, and a living to be made while nothing "just as good. this is being done.

Yet many have told me that they landed here with less than five dollars and are doing well, and seem to have plenty around them on their farms.

The country is being rapidly filled as more than fifteen thousand filings have been made here in Quay county since January 1st, '06. So all the good claims have been taken within a radius of twenty-five miles. But there yet remains homes for many more. Distance counts for naught; about as one to four back there in

To those who are seeking labor will say that labor will be in demand here as the Rock Island is making this an end of a division, building large round house and shops with seven miles of additional switch room; also the Dawson City & S. W. are to build a round house and shops this season. building this season, as Col. Herman

tells me that he has sold more than \$8,000 in vacant town lots since last December.

Trusting this will answer a part of the enquiries asked by friends in the old Kentucky home, will try again if you, Mr. Editor, will kindly per mit. Respectfully,

ALBERT WILBORN.

### Keep Your Nerve

It is nerve energy that runs the organs of your body. The storage battery is the nerve cells in the brain and spinal cord, and from this battery nerve force is sent out through the system of nerves. To keep the body healthy you must have plenty of nerve force; if you have not, the organs work imperfectly, the circulation is sluggish, digestion bad, appetite poor, kidneys inactive, and aches, pains and misery are the penalty.

You can keep the system strong with Dr. Miles' Nervine. It assists in generating nerve energy; it strengthens the nerves and makes the whole system strong and vigorous.

"I take pleasure in recommending Dr. Miles' Nervine to those suffering from nervous prostration, insomnia and meiancholy. After several months suffering from above diseases I tried this medicine and found immediate relief. It soothes and strengthens the nerves, chases away the gloomy and depressing thoughts and gives the sufferer renewed strength and hope. It is a superb nerve restorer." JUDGE JACOB SEEMANN, Madison, Wisconsi

The Supreme Court of the United States has decided against Caleb Powers. This decision was based on Constitutional grounds and was not much of a surprise to the initiated. Mr. Powers will now have his fourth trial before a jury of his peers, and may save his neck, but hardly his

Those of our readers who have relatives and friends in foreign countries, and most of us have, will be pleased to know that a re-classification of mail to foreign countries has been established whereby articles may be sent to foreign countries at the rate of 12 cents per pound. The weight of the package must not exceed four pounds or the value of \$50. It formerly cost \$1.60 to mail a four pound package which we can now send for 48 cents.

The recent battle in the Philip pines between American soldiers and sailors and a large force of Moro robbers, in which six hundred of the latter were wiped out,, shows that all is not peaceful and lovely in those far-off isles. Yet those whole six hundred outlaws were not worth one of the American soldiers or sailors who poured out his life blood in storming and capturing those heights above the clouds. But insignificent as the engagement was in point of numbers it is another bright feather in in the city Tuesday direct from the cap of American dash and valor, and proves that the word "defeat" is expunged from the lexicon of the army and navy of the United States.

The recent explosion from the fa- ted. tal fire-damp of a large coal mine in France, with its horrible loss of human lite, seems to be one of those sad and untoward events which human agency can not guard against, H. ## A. BENNETT, Marion, Ky. B. D. BENNETT, Smithland, Ky OUR NEW YORK

Beautiful Displays In Shop Windows Airy Spring Novelties Shown Beside Winter Furs.

The shops of New York have never presented a more fascinating appear ance than during these last few weeks of midwinter when all the between season fashions are displayed at such amazingly low prices. Early spring novelties, which look deliciously fresh after the heavier fabrics of winter, are shown in airy smartness beside automobile coats and furs.

Apropos of furs, the woman who is thoughtful can now procure the most beautiful pieces-coats, muffs, boas, etc -in such bargains as to make it a good investment for colder weather still to come or for next winter. The luxury of owning a beautiful set of furs is wonderfully gratifying. They lend an air of richness that nothing can equal. and a fur set in three pieces-hat, scarf and muff-can be secured most reasonably. Then, too, fur trimmings are al ways popular on evening wraps or gowns, and combined with these are some of the choicest of laces which make a hat or muff simply adorable Devotees of fashion spend hours in the selection of rare old lace, whose filmy trimmings cost a fabulous sum, for lace is like wine-its value increases with age.

Seen in one of the shops this week that is noted for its exquisite lingerie waists were several that showed instead of medallions tiny lace bouquets of such flowers as snowdrops, lilies of the valley, etc., in such wonderful imitations that it would be hard to distinguish them from real lace. These have an air of individuality about them that was not seen in other models

IN LINGERIE WAISTS.

German valenciennes in clear cut patterns is found in underwear which can be picked up for a very inconsiderable sum. A pretty petticoat was finished with rows of insertion alternating with tucks, and the absence of a lace edging at the hem meant good wear, for con stant laundering could not harm it. To be described with all dainty

things were some stockings whose de signing showed a great amount of thought. As smart stockings are worn at all seasons of the year to correspond with gowns, one shop was just overflowing with every variety of production, some of fine silk inset with real lace butterflies. Openwork stock ings are not so popular as last season but the real thing is a fine mesh with hand embroidery. The loud coloring of a season ago have been relegated t the background of the out of dates an are replaced by exquisite pale tints t match pale shaded gowns. Clockwork KENTUCKY, stockings lend a slenderness to the ankle and are the essence of smart ness. A very economical way in selecting fancy silk stockings is to get those having lisle thread feet, as they are more durable.

Nearly every girl, be she rich or poor has some pet fad in dress that she in a shopper's standpoint she has a great est embroidered linen, and the more elaborate ones are made of soft chif-

feta in soft folds, with a turn over of ped the same day as received. Alice blue embroidered in a miniature plaited messaline were caught at in tervals with fine lace bands. All the new gowns show the collars to be quite high. Some are fastened in the back all goods purchased from us. fastening that spoils the neatness of so charges. many gowns.

(Our readers may have advice on purquestion concerning fashion or fabrics answered without R. H. MACY & CO. charge by Rene Deveraux, the fashion expert, by addressing Rene Deveraux, P. O. Pox 269, Madison Square, New k. inclosing stamp for reply.]

-That's what a prominent druggist said of Scott's Emulsion a short time ago. As a rule we don't use or refer to testimonials in addressing the public, but the above remark and similar expressions are made so often in connection with Scott's Emulsion that they are worthy of occasional note. From infancy to old age Scott's Emulsion offers a reliable means of remedving improper and weak development, restoring lost flesh and vitality, and repairing waste. The action of Scott's Emulsion is no more of a secret than the composition of the Emul sion itself. What it does it does through nourishment-the kind of nourish ment that cannot be obtained in ordinary food No system is too weak or delicate to retain Scott's

#### A CONVICT'S ROMANCE

ODD WAY IN WHICH A LIFE PRISONER WON HIS FREEDOM.

The Story of the Construction of the Old Statehouse at Albany-The Price of a Genius Who Saw and Grasped His Opportunity.

Vouched for by the late Henry Smith, who said he learned the fact through being speaker of the assembly, there is an interesting bit of history connected with the old statehouse at Albany, where it has stood for years, the finest example of pure Doric architecture in this country, on the easterly side of Eagle street, between Pine and Steuben streets, its walls and partitions all of solid stone, very much as if its halls, rooms and stairs had been carved out within a huge block of marble.

It was completed in 1842, costing the state about \$350,000. It is built entirely of Sing Sing marble, quarried and cut within the prison walls.

The old capitol being inadequate to accommodate the increasing business of the state, this additional building was planned and built and is still used for the offices of the state comptroller, the state engineer and surveyor and the state banking department.

In a spirit of economy it was decided to have as much as possible of the work done by the prisoners from the material found within the prison walls at Sing Sing, fairly good material, too, but not the best, as it is a soft marble, as evidenced by the wear which now shows so plainly in the steps and by the crumbling of some of the stones from exposure to the weather. All the material was cut to completion within the walls of the prison under such plans that when shipped to Albany there Emulsion and gather good would be no further work necessary except practically to lay one stone upon another, and so on until the whole was assembled in the completed build-

> To accomplish this detailed plan a system of marking the stones was necessary. The plans were carefully made and a system of marking elaborately laid out by the architect in charge, who found in the prison at Sing Sing a life prisoner whose record showed him to be an engineer of the highest ability and who seemed as competent as any man in the country to carry out the work to be done in the prison, and naturally be was not unwilling to follow his chosen profession in preference to doing the manual labor of cutting or quarrying stone. So, following the spirit of economy referred to above, the plans in detail and the system of marking were turned over to him and the whole work at that end given over to his full superintendence and absolute

In due time the stones in their varions shapes and sizes and in quantity Albany and the work of construction commenced in accordance with the plans and system of marking originally furnished. With the very first stone there was trouble. It not only did not fit the place, but none of the stones marked to adjoin it fitted it, and, further, it did not seem ever intended for the place the number indicated. Investigation brought out that the stones were not of the sizes or shapes specifled and shown on the plans, and, as to the system of marking, it was quite vident that the stones brought together by it had no relation whatever to

The bewildered architect hardly knew whether he was a candidate for the asylum or possibly for Sing Sing. Howover, a careful verification of his plans and his marking system proved their correctness, and the blame fell squarely upon the civil engineer, the life prisoner. He was questioned, taken severely to task and roundly rated for his incompetence and threatened and abused. He met it all calmly. "It looks to me like a mighty good joke on you fellows. Anyway it is the best joke I have heard ince I came to Sing Sing." As to their continued threats be said;

What can you do to a life prison-

Finally, in answer to the abuse and turs as to his capabilities as an engineer, he said he had changed the plans both in dimension and shape where they had diverged from purity of style, and the system of marking he had changed altogether, but if they could find some one who understood his system the building would go up complete and perfect, excelling the original plan. "But," he added, with a grin, "you can probably get out new stone a good deal quicker than you

Then the state officials said, "We will

They pointed out the advantage of life in Albany for a time in preference He said, "No."

They tried to bargain with him. He said, "Secure my pardon and I

They offered to have him pardoned after he had proved what he said by finishing the building.

He said, "No. Then they said they would compel him to do it anyway

He said he could be compelled to work in prison, but not in Albany, and that even in prison they could compel him to do only manual labor unless he chose and that the price of his genius come his way was a full pardon. What else was there to do?

He was pardoned, and the old statehouse stands today in testimony of the fact that he kept his word and a glorious memory to an unknown genius.-New York Herald.

## Do Not Neglect a Cold.

Every cold weakens the Lungs, lowers the Vitality and makes the system less able to withstand each succeeding cold, thus paving the way for more serious diseases.

CAN YOU AFFORD TO TAKE SUCH CHANCES?

> SOLD AND RECOMMENDED BY Woods & Orme, Druggists, Marion, Kv.

Frequently in the south one finds among the negroes as remarkable Christian names as those bestowed of a negro living near Richmond who for years had been familiarly known to him as Tim. It became necessary at one time in a lawsuit to know the less imitations have similar sounding full name of the darky. The not unnatural supposition that Tim stood for Timothy met with a flat denial.

name sin't Timothy. It's What-timorous-souls-we-poor-mortals-be Jackson. Dey jest calls me Tim fo' sho't."-Suc- remedy for coughs and colds. Woods cess Magazine.

Angelo's Verdict.

Once a painter notorious for plagiarisms executed a historical picture in which every figure of importance was copied from some other artist, so that very little remained to himself. It was shown to Michael Augelo by a friend, who begged his opinion of it. "Excellently done," said Angelo, "only at the day of judgment, when all bodies will resume their own limbs again, I do not know what will become of that historical painting, for there will be nothing

> An Animal Story For Little Folks

He Got His Money's Worth

The circus was coming to town, and all the children were in anxlous expectation. "If you go," said the teacher the day before, "be sure to see the elephant, the most knowing of all quadrupeds and for sagacity called the 'half reasoning elephant."

I ain't been doin' chores all de spring fer nuttin'. Once within the canvas he made ly,

straight for the elephants. "Gee!" said Mickey. "Who punctuated your tire?"

"What's that yer givin' us, young ster?" replied the elephant.

"Some one must have stuck pins in your cover, all right," grinned Mick, 'for you're all wrinkled up. Say," he continued, "can you tell me why you are like a stove?

The great beast shook his head. could tell you part of it." he said.

"Part's no good," answered Mick. "'Cause neither of yez kin climb a tree plate. I had to eat it or diff between you and a tree?" "Because the trunk is not on the that came my way, they re bough, but the bow is"

"Why don't you go on?" asked Mick. "Because I'm not expected to." "Why aren't you expected to?"

"Is that all?" asked Mick in surprise. "That's all. You see, I'm called the half reasoning elephant, and I don't in- ly

Kentuck

To Cure a Felon' of Phillips

The ten thousand long-suffering, earnest, conscientious, over worked, har paid school teaches will hail the news with great joy. The intelligent citizens of the State who know the value of a trained teacher, will now look forward to a brighter day for their children and their neighbors' children. It is indeed a hopeful sign. This forward step will prove to be the most far-reaching in its effects upon the future prosperity of Kentucky of any educational measure ever passed; and, should the bill pass the Senate, as it doubtless will, it will mark a distinct epoch in the ed ucational history of this commonwealth, as well as immortalize the patriotism, wisdom and foresight of the Legislators who stood for its passage.

The bill provides for two schools, the location of which is to be left to open competition among the towns and cities of the state desiring the lantion of same. A Commission of seven, composed of one member from each Appellate Court district, is created, whose duty it is to hear all bids and propositions, and to locate the schools in the places offering the most advantageous conditions, everyhave a Board of Regents of five members of which the Supt. of Public Instruction is Ex-officio chair man. These Boards have general management of their respective schools.

There is also provided a Normal Executive Council composed of the Superintendent of Public Instructions and the Presidents of the two schools. This council determines the course of study and the requirements for adaission and graduation.

Ten pupils from each county may receive free tuition in these schools, provided they pass the required examination and sign an agreement to teach not less than three years in the schools of Kentucky. Reasonable auition will be paid by other stu-

The bill appropriates \$50.000 00 for the two schools, to be expended follows: \$5,000 each for equipent, and \$20,000 each annually for

It is to be regretted that the State reasury is in such a depleted condion that it is impossible for the pre-Assembly to appropriate more for this most important ork; but the start is a good one, and trust that future legislators may way clear to appropriate ally enough to bring this State a level educationally with her

#### Dying at the Top.

BY O. G. W.

There are diseases of the brainslow paralysis; several kinds of atrophy, clot, and decay of tissues, that though very gradual in their action, are literally a species of dying at the top. The mental powers decline, are extinguished, fade. Often only the physical functions remain intact and even the body can eat and sleep after sight, hearing, and acuteness of sensation have been destroyed by the ruthless progress of the malady.

But it is not alone cases of this kind that may be included in a slow, almost imperceptable decay of the powers and capacities of life on the higher plane. Arrest of growth is thing considered. Each school is to the beginning of death. It is the terrible law of nature that the being who does not progress must retrograde. There is no place on the fearful ascent of life where spiritually and intellectually we are not forced to go forward, lest we slip back. But it is a happy provision of nature that even in the longest life there is no arbitrarily fixed point of time where expansion must cease as if by fiat, where there are no more heights be to be obtained, no breadening and Always and forever a new bud may be formed on the topmost bough of the old tree, even though the trnnk be partly hollow and the nourishing sap mount mainly through the

> One of the conspicuous signs of the change from growth to slow decay is the loss of interest in what does not concern self, the concentration of thoughts and feelings, hopee and fears on the narrow world bounded by a house, a room, a fireside, an "old arm chair," the state of the digestion, a pain in the head, twingt of the foot. The only way to forget petty miseries and infirmities, if not to cure them, is not to lose hold of that which is outside of self, larger than self, lovelier and better than self. Nature happily has placed no limit to the exercise of the intellectual powers. If at a certain age the hour of the great translation which creative powers fall in abeyance, the awaits us all. mind may still exercise itself in a thousand things that will keep it fresh, stimulated and active. If the greatest possible rate of progress can not be made, say after the sixtieth year, still a fair advance is always possible. The old who win the admiration of the world are those who are still mentally young, blooming at top amid the frosts of age. This is always possible unless some of the mysterious forces of disease have un- to look out a location. dermined the whole being, when the mind is turned outward to the great spectacle of the world and inward to thought and reflection, which alone make observation of value. Mere inanition from loss of grip on the large interests and concerns of life, lead 22 fine hogs Monday, L. E Cook to the few absorbing passions of a de- went with them. caying old age, sordidness, discontent and inordinate love of comfort. It seems that the old too easily give W. B. Yates. up exercise in the open air. The Kendall of Phillipsburg, housebound habit is ene of the new ist cover it over with Buck- series of pettiness, encessive thrift, a Salve and the salve will and carefulness. The general virtues

> > from the illimitable expanse of this gave a Bible,

o ean must be kept in living relation with the whole, else we stagnate. Our path becomes stale, formal, unemotional. There is a deeper meaning than we suspect in the myth of the angel that came down and stirred the waters of the pool of Bethesda. Many churches that I "wot of" need this experience of the angel in their little pools that are in danger of gathering over seum; for churches dividuals. Formalism, routine, pree dent, conventions, may be more deadly than some of the sins counted The breath of the living God shal! pass by not once only, but many times, to make a church as vital as it ought to be, and in this breath alone is vitality and growth, Even the senile decay of old age

of a growing faith, an effort to rest above heaviness, inertia and languor, invited. y the spirit that knows no age, but is eternally young. As the bees mnnity. make honey so should human beings make a provision of spiritual and and mental vigor that will boar them not decayed, but ripened to the gates of death! It seems, perhaps, preposterous to say that the will can new skiffs. keep us young, interested thrilling to the touch of humanity, and the progress of the age, to all the good and great objects of life. Single instances, here and there, show that Itching, Blind, Bleeding, Producing the prolongation of mental life and not an empty dream. As the race to cure in 6 to 14 days. 50c. progresses it is more than probable that mankind may find the secret of a much longer period of existence, and may find it in keeping alive at the top, joined to those rules of living enjoined by the laws of nature. But these results will never proceed from a late resolve, the first half of life spent on indulgence and selfish

#### Finnie Corley has bought the Jno. St. Louis Live Stock Market.

Reported by Evans-Snider-Buel Co., Live Stock Commission Agents.

Special to THE PRESS.

National Stock Yards, Ill., March 14th. - A light run of cattle here the fore part of the week met with an F. I. Travis bought some very nice active demand and stronger values. Beef steers are 15 to 20 cents higher than a week ago, most strength being noted on the tidy handy weight steers, 1250 lbs. or less, at round 5 cents per lb. A good many good to choice grades are selling from \$5.50 to \$5.75 with an extreme top of \$6 Ed Turly and family were guests per cwt. for something strictly prime. of Albert Crayne and wife Saturday The bulk of the medium to good 900 to 1250 grades are selling from \$4.50 to \$3.00.

> The butcher cattle trade shows a 10 to 15 cent advance also as compared with last week. Choice fat heafers selling around 5c again; medium to good grades \$3.75 to \$4.50, however, these prices apply to good quality stuff that is tat. Cows show even a little more advance than heifers. Most of the choice fat heavy cows selling from \$4.25 to \$4.60, but only a few good enough to bring these prices as there are lots of pretty decent cows selling from \$3.85 to \$4.20 and a considerable number of medium grades at \$3.25 to \$3.75 fair to good canners \$2,25 to \$2,50.

There is very little change in the stocker and feeder market as compared with last week. Feeders and good grade stockers are scarce and sales above \$4.25 are few, bulk of the plain to good average steers \$3.50 to

Hogs seem to have about reached the best prices they will bring this There was a singing at Sam Per- spring and we do not think it advisable to hold longer with a view of getting better prices. Values have fluctuated within a narrow range this week and last and the bulk of the sales have been made on the following basis: best butchers and plain pigs around 120 lbs. \$6.00 to \$6.15; Mr. Marion Wring, of near Em- plain packers \$6.10 to \$6.25; good as the Mangum office is to be disconsouthwest lights \$5.25 to \$5.75 and tinued in April. a good many little pigs, less than 100 | The President sent the following lbs., \$4.50 to \$4.75.

> "Just as I got half way over, the shark put on speed and forged head down on me. For a moment, as saw that green, submarine streak of fire, with the glistening dorsal fin sticking up higher than my head, coming straight for me like a shot, I was turned directly at him pounding and lashing the sea with hands and feet and blowing the water to make a bellowing noise. The man-eater sank beneath the surface, and I could see his aintly illuminated outline going down, down, slowly, till it glimmered fathoms deep. Then I got my hand under my companion's armpit and helped

"I guess you don't ever want a moon-

light swim here again after that, eh?' said one of his hearers.

"Oh, we were kind of scared, all right," was the reply, "but it wasn't that bad. Only I will confess that we sat around for nearly an hour getting our nerves straightened out before we swam back."

#### GREAT CULEBRA CUT.

The wharf rats of New York and Biggest Piece of Digging Ever Under taken-A Huge Mexican Drainage

The huge excavations for the Panama Canal across the Culebra divide will be by far the greatest furrow in chance with us, or the chances that the earth's surface ever made by human agency. This statement is made by the Engineering News, in a comsociated with the daring swimming prehensive discussion of the great excavation projects of the world. The however pleasant and enjoyable his big Panama cut is so large that the excavation which is at all comparable the Manchester Canal and the Suez Canal; but all these were built through comparatively level country.

parable with that to be made through the Cuelbra divide is the great Nochistongo cut through the hills which "One evening," said the man of surround the Valley of Mexico. This commerce, "after I had been in Ja- huge excavation was begun in 1640, maica, having a week of the joys of for the purpose of affording an outlet greatest depth is 197 feet, and its greatest width is 361 feet. The total amount of material excavated was about -54,-000 cubic yards. In comparison with this the cut at Culebra will have e total cube of excavation at the ulebra divide was estimated by Engineer Wallace as 186,000,000 cubic ards for the sea-level canal and 111,-000,000 cubic yards for a canal with a sixty-foot summit level.

While in mere size of excavation the cut through the Panama divide is by far the larger, the fact that the Nochistongo cut was made with absoutely no aid from machinery or mechanical power, but wholly with human muscle, makes our task on the sthmus seem like mere child's play in comparison with that accomplished by those patient toilers under the torrid sun of Mexico two centuries ago. When one recalls that this deep, artificial valley, more than twelve miles long, was all dug by the labor of Indians, who excavated the material with the crudest hand tools and carried it in baskets on their heads to the place of final deposit, the great cut of Nochistongo is entitled to rank, with come very shortly? he Pyramids of Egypt, among the world's greatest wonders.

#### What Governs Price of Dogs.

The price paid for a dog seems to be the animal as the sentiment of the purment of our entire fund of natural chaser in the vast majority of cases, and, as a rule, the sporting dog brings the lowest figure. Doubtless this is due to the fact that the man who wants a gun dog is a practical person, while the seeker after the "show dog" pays for running the "show." It is granted right here that many a good gun dog also shows well, but the highest prices go for the show animal, pure and sim-

At a recent sale of pointers and setters at Birmingham, England, one of the most important sales in years, the entire lot-two score or more-sold for \$3,025. The highest price paid was \$325, for the famous female pointer, Coronation (four and a half years) the winner of many championships; while among the setters the choice was Ightfield Bang (four and a half years), a great field trial winner, who brought only \$185. American purchasers would have thought these dogs cheap

at \$1,000 apiece. In contrast with these prices, the bull terrier Woodcote Wonder sold in New Haven for \$5,000 to a San Francisco purchaser, Richard Croker, Jr., paid \$3,000 for his Champion Rodney Stone, and Frank Gould paid as high as \$5,000 for a St. Bernard. These are real prices-unlike many of the amounts running up into the thousands tagged on to bench space, of not a few 30-cent dogs, exhibited at some of the kennel shows, where it is believed necessary to have something attractive.

#### Highest Salaried Woman.

Miss Kate Holliday Claghorn, of Brooklyn, has been appointed to be registrar of the tenement house department of the city and is the highest paid woman in the civil service of New York State, her salary being \$3,000 a year. At a competitive examination, the only other person to pass was George Hale, a veteran in the department, whose average was a little less than that made by his successful rival.

Miss Claghorn is a very pretty young woman of modest and unassuming

#### RESOURCES OF THE SOUTH.

THEY ARE MAGNIFICENT: BUT DEVELOPMENT HAS ONLY JUST COMMENCED.

No Section of the United States Offers Productive Land So Cheap. Rural Homes.

BY WILLIAM E. SMYTHE.

It is a comfort to us to look fo, ward to the day when our children and our grandchildren will be fullfledged citizens of the Republic? Will they have the same chance or an equally good our fathers and our grandfathers had to enjoy the blessings of our free institutions? Will they have the chance that we have to make or secure, each, a home of his own?

It has been said that the true test of statesmanship is the provision which is made for the comfort of posterity. The present population of the United States

WILLIAM E. SMYTHE.

is 80,000,000. A generation more, at the present rate of nicrease, and if secure a living for himself and his considerably greater maximum will be 120,000,000 or 130,000,000. A tamily—this is the work than which depth and width, even for the project century hence, it will be 500,000,000. there is no more important question The children of some of us, anyway before the country to-day. our grandchildren, will live to see that date. Will the United States then be able to sustain such a population? No, nor half that number, even with every to a discussion of the opportunities for arable acre cultivated according to domestic expansion in various parts of present methods. It is estimated that our great country, and of the need of with every such acre cultivated after private and public enterprise in makthe present manner, the country could ing these opportunities available for produce only enough to sustain 144, the masses of men. > Do we ever stop to think that the matter for organizing rural settlement citizen of the Pacific Coast, I never throughout the United States-of fully grasped the truth about the "Building the Unfinished Republic," if South until through travel, I saw and you please—is not merely a matter of came to know things as they are. I increasing material prosperity, or even once thought of the South as an old a matter of making homes for the country, vastly interesting because of homeless, but something which is ablits historic associations, running back solutely vital to the very existence of to the earliest English settlements on the Nation in times to come, and to this continent, but practically deve-

Somebody must look ahead; somebody must take account of the needs ferior to some other portions of the of the future. This is a portentous Union, especially to those of the Far question which the future must an West. swer, and which the future simply cannot answer unless the present generation begins to organize its forces for is a new country, with immense regoverned not so much by the value of the systematic and scientific develop-

wealth ,nor even then unless methods are devised to prevent waste and to increase efficiency in every direction.

The Prophecy of Malthus. A century ago, one Malthus, started the world by depicting the horrors which would some day come from over-population. His theory was that the number of human beings increased much faster than the means of Opportunties for Many Millions of subsistence; hence, that disaster must come in the natural course of events. It was not given him to foresee how vastly the means of subsistence would be increased through the invention of labor-saving machinery, the discovery of new crops and methods of cultivation, and the improvement of

the means of distribution.

So that many of the present-time writers, having in mind the advance of science, speak in no little derogation of the teaching of Malthus as narrow and grounded upon ignorance of the vast, ever-unfolding resources of the world. Nevertheless Malthus's warnings were not entirely unjustified. and as applied to ourselves it must be conceded that the thoughtful people of the United States have no more urgent business than to make broad outlets for surplus population upon the soil and to train the rising generation so that it will know how to make the best possible use of natural resources now wastefully employed or altogether neglected. Necessity, the prolific mother of invention, will doubtless continue to place in our hands new tools which will multiply our power of production; but if we would escape grave trials and hardships we must do thoroughly and well the work which needs to be done in organizing prosperity for our people by means of rural settlement.

The rural settlement, and all that this term involves in its broadest anplication—the division of land into smaller farm homes, sufficient for the support of a family from the soil, the diversification of crops, and their utmost cultivation and the improvement and breeding up of plants so that they will yield their greatest product, the utilization of every waste and unproductive acre-in short, the settling of the entire country into small rural homes, so that each family shall own a piece of land from which he may

#### The Empire of the South.

The truth is something very different. In an economic sense, the South

(Continued on next page.)

THE ANGLE LAMP

is not an improvement on the old style lamp, but an entirely NEW METHOD of burning oil which has made common kerosene (or coal oil) the most satisfactory of all illuminants.

And when we say satisfactory we mear satisfactory—not an illuminant that merely gives a brillant light, but or the combines brilliancy with soft, restful, pleasing quality; that is convenient as gas, safe as a taflow candle; and yet so economical to burn that in a few months' use

IT ACTUALLY PAYS FOR ITSELF

The ordinary lamp with the round wick, generally considered the cheapest of all lighting methods, burns but about 5 hours on a quart of oil, while The Angle Lamp burns a full 16 hours on the same quantity. This, even where oil is cheap, soon amounts to more than its entire original cost. But in another way it saves as much-perhaps more. Ordinary lamps must always be turned at full height, although of an average of two hours a night all that is really needed is a dim light ready to be turned up full when wanted. A gallon of oil a week absolutely wasted, simply because your lamps cannot be turned low without unbearable odor. All this is saved in The Angle Lamp, for whether burned at full height or turned low, it gives not the slightest trat of odor or smoke.

You should know more about the lamp, which for its convenience and soft, restful light, might be considered a luxury were it not for the wonderful economy which makes it an actual necessity. Write for our catalogue "15" fully explaining this new principle of oil lighting, and for our proposition to prove these statements by

#### 30 DAYS' TRIAL

When such people as ex-President Cieveland, the Rockefellers, Carnegies, and thousan of others, after trying The Angle Lamp, find it profitable to rip out gas and electric light is tures to threw away gasoline and acetylene out fits or ordinary lamps, it is surely worth yo while to send a penny postal to find out about it.

Write for Catalogue "15," listing 33 varieties from \$1.80 up and our booklet, "Lighting and Comm. Sense," which gives you the benefit of our ten years of experience with all kinds of lighting methods.

#### Close to Fine Markets.

But the Southern truck-gardener and fruit-grower can reach great cities : in every direction in twelve, twentyfour, and thirty-six hours. He is surrounded by mining and manufacturing centers and has quick access to the big cities of the North. He is favored, of course, by the latitude, which enables him to produce both the necessaries and luxuries of Northern tables while Jack Frost still holds the earth in his grip above Mason and Dixon's line.

In the matter of transportation, the new settler in the South is fortunate. Compared with newer sections of the country, the South is gridironed with railroads. Not only so, but it enjoys important natural advantages in the way of navigation, both interior and exterior. It is manifestly good railroad policy to facilitate the settlement of tributary railroad territory by making rates which encourage colonization and enable the settler to prosper. Railroad earnings and values increase rapidly with population and develop-

The opportunities of the South constitute an open invitation to all men The waiter reported the uncomplimen- operate them. In the battlefield memowho desire to improve their conditions of living by getting an independence from the soil. The man who wants to avail himself of these opportunities may do so at once, with a small outlay of capital, without waiting for the adoption of new public policies of any sort. But it is impossible to travel through the Southern States without thinking of the obligation which rests upon the Nation to do certain things which must be done before the largest economic results can be achieved.

I have been interested for many years in the promotion of a government irrigation policy and in scientific forestry and systematic colonization, which are inseparably associated with it. But these are only a part of the great work of internal improvements to which the government must set its hand. They are but a portion of the bigger problem of Building the Un-Inished Republic and "finishing the world in partnership with God."

#### To Upbuild the Nation.

The United States should drain the Southern swamps for precisely the same reason that it stores the waste flood water to irrigate the Western deserts in order that we may widen the foundations of our national life, enhance the common prosperity, and tary request to the proprietor, whereupon rials now being erected in many lo give men more room in which to build the latter approached the customer and calities figures of soldiers, mounted

A MASTERPIECE SHAPED BY PNEUMATIC TOOLS.

The tablets, statues, monuments and other memorials which are finding a place in rapidly increasing numbers upon these historic battlefields have been erected in some instances by the Congress of the United States, but in a majority of cases the expense has been defrayed by States or by veteran or patriotic organizations. Some of the memorials are mute testimonials to the bravery of fallen comrades, while others are tributes to the commanders conspicuous in this engagement or that. However, the matter does not stop here and of late many commemorative masterpieces of sculpture have been installed to mark in each instance the exact spot rendered memorable by some notable assault or de hand. fense or some other unusual event in the great drama of the War for the Union.

## 31 Boxes of Gold

300 Boxes of Greenbacks

For the most words made up from these letters

Y-I-O-Grape-Nuts

331 people will earn these prizes.

Around the fireside or about the well-lighted family reading table during the winter evenings the children and grown-ups can play with their wits

20 people making the greatest number of words In this mechanical chiseling the will each receive a little box containing a \$10.00 gold piece.

10 persons will each win one box containing a \$5.00 gold piece.

300 people will each win a box containing \$1.00 in paper money; and one person who makes the ator can with the utmost ease and highest number of words over all contestants will receive a box containing \$100.00 in gold.

> It is really a most fascinating bit of fun to take up the list evening after evening and see how many words can be added.

> A few rules are necessary for absolute fair play. Any word authorized by Webster's Dictionary will be counted, but no name of person. Both the singular and plural can be used, as for instance "grape" and "grapes."

> The letters in "Y-I-O-Grape-Nuts" may be repeated in the same word.

> Geographical names authorized by Webster will Arrange the words in alphabetical classes, all

> those beginning with A together and those beginning with E to come under E, etc.

> When you are writing down the words leave some spaces, in the A, E, and other columns to fill in later as new words come to you, for they will spring into mind every evening.

It is almost certain that some contestants will tie with others. In such cases a prize identical in value and character with that offered in that class shall be awarded to each. Each one will be requested to send with the list of words a plainly written letter describing the advantages of Grape-Nuts, but the contestant is not required to purchase a pkg. These letters are not to contain poetry, or fancy flourishes, but simple, truthful statements of facts. For illustration: A person may have experienced some incipient or chronic ails traceable to unwise selection of food that failed to give the body and brain the energy, health and power desired. Seeking better conditions a change in food is made and Grape-Nuts and cream used in place of the former diet. Suppose one quits the meat, fried potatoes, starchy, sticky messes of half-cooked oats or wheat and cuts out the coffee. Try, say, for breakfast a bit of fruit, a dish of Grape-Nuts and Cream, two soft boiled eggs, a slice of hard toast and a cup of Postum Food Coffee. Some amateur says: "A man would faint away on that," but my dear friend we will put dollars to your pennics that the noon hour will find a man on our breakfast huskier and with a stronger heart-beat and cleared working brain than he ever had on the old diet.

Suppose, if you have never really made a more for absolutely clean health that pushes you along each day with a spring in your step and a resent vigor in muscle and brain that makes the doing d things a pleasure, you join the army of "plain of common sense" and start it now. Then after you have been two or three weeks on the Grape-No training you write a statement of how you used ! be and how you are now. The simple facts will interest others and surprise yourself. We need publish names except on permission, but often tell the facts in the newspapers and when requested give the names by private letter.

There is plenty of time to get personal experence with Grape-Nuts and write a sensible, trutle ful letter to be sent in with the list of words, as the contest does not close until April 30th, 1900 So start in as soon as you like to building word and start in using Grape-Nuts. Cut this statement out and keep the letters Y-I-O-Grape-Nuts beid you and when you write your letter you will h some reason to write on the subject "Why I Of Grape-Nuts."

Remember 331 persons will win prizes, who will be awarded in an exact and just manner soon as the list can be counted after April 30, 190 Every contestant will be sent a printed list of name and addresses of winners on application, in organical to have proof that the prizes are sent as agr The company is well known all over the won for absolute fidelity to its agreements, and eve single one of the 331 winners may depend on a ceiving the prize won.

Many persons might feel it useless to col but when one remembers the great number prizes-(331)-the curiosity of seeing how in words can really be made up evening after even and the good, natural fun and education in competition, it seems worth the trial; there a cost, nothing to lose and a fine opportunity one of the many boxes of gold or greenbacks.

We make the prediction that some who we prize of gold or greenbacks, will also win health and strength worth more to them wagon full of money prizes.

There are no preliminaries, cut out this state and go at it, and send in the list and letter April 30th, 1906, to Postum Cereal Co., Ltd. Creek, Mich., and let your name and address plainly written.

The Adorable Patti.

The famous Adelina Patti, always young, despite her years, first appeared in 1859, at the New York Academy of Music. She was brought forward under the direction of her kinsman and mashad recovered enough for me to report at police head-quarters.

This prediction had quick fulfilment. After a short initial engagement in Philadelphia, Mlle. Patti, piloted by Strakosch, embarked on a concert tour which ended at New Orleans, whence e sailed for London where she may said to have fairly begun a career, ich, like her art, must remain long que in lyric annals. Thereafter for ward of 40 years, she held first place, during the greater part of that e, she was not only a sweeter, but better singer than any other woman the world. Her name lends a goldending to any record of the early ays of opera in America.

Adulterated Dresses.

Public attention is being directed the wholesale manner in which the aterials that keep us warm during day, and the blankets which cover at night, are adulterated.

The silk dress of the lady of a hund years ago rustled as she moved, account of the genuineness of the abric; now it rustles with 36 per cent salts of tin used to commercialize it. The lady of the period in her silk dress indeed, a sort of "woman in armor." Epsom salts, instead of being used medicinal purposes, as formerly, are w employed, it would appear, for ading flannel. The so-called table en of today is not pure linen, such feeding of wild birds gives a number as delighted the hearts of the housewives of olden times but is made largely of cotton, filled with china clay and starch. So, too, collars are

Experiments have firmly packed by allowing animals to shown that if these animals were kept run over it, thus preventing injurious

To Save All the Fertility.

A more elaborate and expensive style of covered yard, a plan for which is furnished by the Department of Agriculture, provides not only for the required protection of both animals and manure, but also affords an excellent grain chamber where feed can be stored for convenient use. Under the side roofs is also afforded a chance for the storing of small tools and a great variety of articles that are continually in the way when lying about the farm buildings. It also provides splendid protection to animals when housed at night during the summer, this roof protecting them from heavy showers in the night and affording good chance for exercise in the winter, as all the sides, except that toward the south, can be protected against cold winds through temporary boarding.

Many stables are so situated that by adding a cheap lean-to, a manure the only female in our camp of rough, "pit" is easily produced. The out brawny men, but one whom any of side boarding of the lean-to should be, for a part of the way at least, put horizontally and hung in the form of flat doors, so that the manure can be the logs on the skid, some sawing them easily loaded on a wagon standing on into boards, others carrying the boards

to shippers of this arrangement can each sheep \$2. The fertilizing value the outside of the building.

Rattlesnake Den.

We were lumbering in central Pennsylvania during the summer of 1870, our portable steam mill standing in piece of woodland, near a small ream and within a short half mile of a rocky ledge, known as "Rattle-

nake Den. During the hot days, rattlers were onstantly met, and "Harry," who rove the daily stage through the "Narows," had won quite a local reputaon from having killed more than a core since the melting of the snows. The pretty young wife of our enineer had charge of the boarding ouse, and after the noon meal was erved, the dishes cleared away and e house put in order, she was ac istomed to bring her sewing into the ade near our Planer, which was the eanest and coolest part of the mill, and sit for an hour or two before comencing the preparation of the sup-
